

From the Show History screen, Designated Admin users can also revert changes made during each session and all changes following that session effectively rolling back the Plan Document to the state prior to the selected entry. To revert changes, click **Revert** at a point in the checklist change history that you would like to revert to. **Note:** Clicking **Revert** will undo all changes made during the session you have selected. Reverting changes also creates a record in the Show History log, and reverts can also be reverted.
