Printing Form 1096

11/21/2025 9:15 am CST

Users need to print these returns on '1-up' preprinted paper. This is obtainable from Nelco Solutions, a vendor that ftwilliam.com works with. Users should feel free to use other vendors. Before printing copies of Form 1096, it is necessary to check the printer. Every printer is different, and it's important that the printer is aligned correctly before users begin to print multiple forms. First, ftwilliam.com suggests reviewing Aligning Your Printing above.

Then, users should click on the "1096 Single" in the "Print Menu" box. This will produce a blank Form 1096 just containing the payer data. It is a good idea to test print on blank paper and hold it up to the special red paper for the Copy 1096 before actually printing on the special red paper. Users can make adjustments in "Print Options" until the alignment is correct.
